LET'S TALK ABOUT P/F GRADES

CONSIDERING P/F GRADES?
It's important to consider whether choosing the P/F option for your courses is the right choice for you. We will talk about a few things to consider below. As always, we are here to support you and help you navigate new policies and strategize about what's right for you personally.

P/F MAY BE GOOD IF...
- You are struggling learning and succeeding in this new online environment and don't want your academic performance this semester to affect your GPA.

We are all adapting to a new way of doing things right now. We understand this isn't what any of us expected. P/F grades will NOT affect your GPA positively or negatively.

P/F MAY BE GOOD IF...
- You do not need to boost your GPA.

P/F grades do not change your GPA. Keep in mind, if the grade is Pass it will earn academic credit; the Fail grade will not earn the credit.

DO I HAVE TO GO ALL IN?
No! You can choose to change some classes to P/F and leave others as “normal” letter grades. Check in with your advisor if you need help strategizing the best way to do that based on your current cumulative GPA, major GPA, and post grad plans.

P/F MAY NOT BE IDEAL IF...
- You want or need to boost your cumulative or major GPA.
- You are utilizing a CRO for a previous low grade and feel you are doing better in that course this semester.

GOOD TO KNOW...
- P (pass) grades in core or pre-requisite courses WILL count towards your degree and allow you access to future courses in our degree.
- Many graduate programs say that they plan to be flexible with Spring 2020 courses when considering applications. Check with your advisor and pre-health professions advising if you have specific concerns.

REMINDER: YOU HAVE UNTIL THE LAST DAY OF SPRING 2020 CLASSES TO CHANGE YOUR GRADE OPTION IN UACCESS. WE'VE POSTED THE INSTRUCTIONS ON OUR WEBSITE UNDER THE PHYSIOLOGY ADVISORS PAGE.
